NAV
DESIGNER SERVICES

60 years of Australian Innovation –

Australian owned and operated since 1962, NAV is committed to innovating the way Australians design functional and beautiful spaces in the workplace and community, and in the home.

Australian owned and operated since 1962, NAV is committed to innovating the way Australians design functional and beautiful spaces in the workplace and community, and in the home.

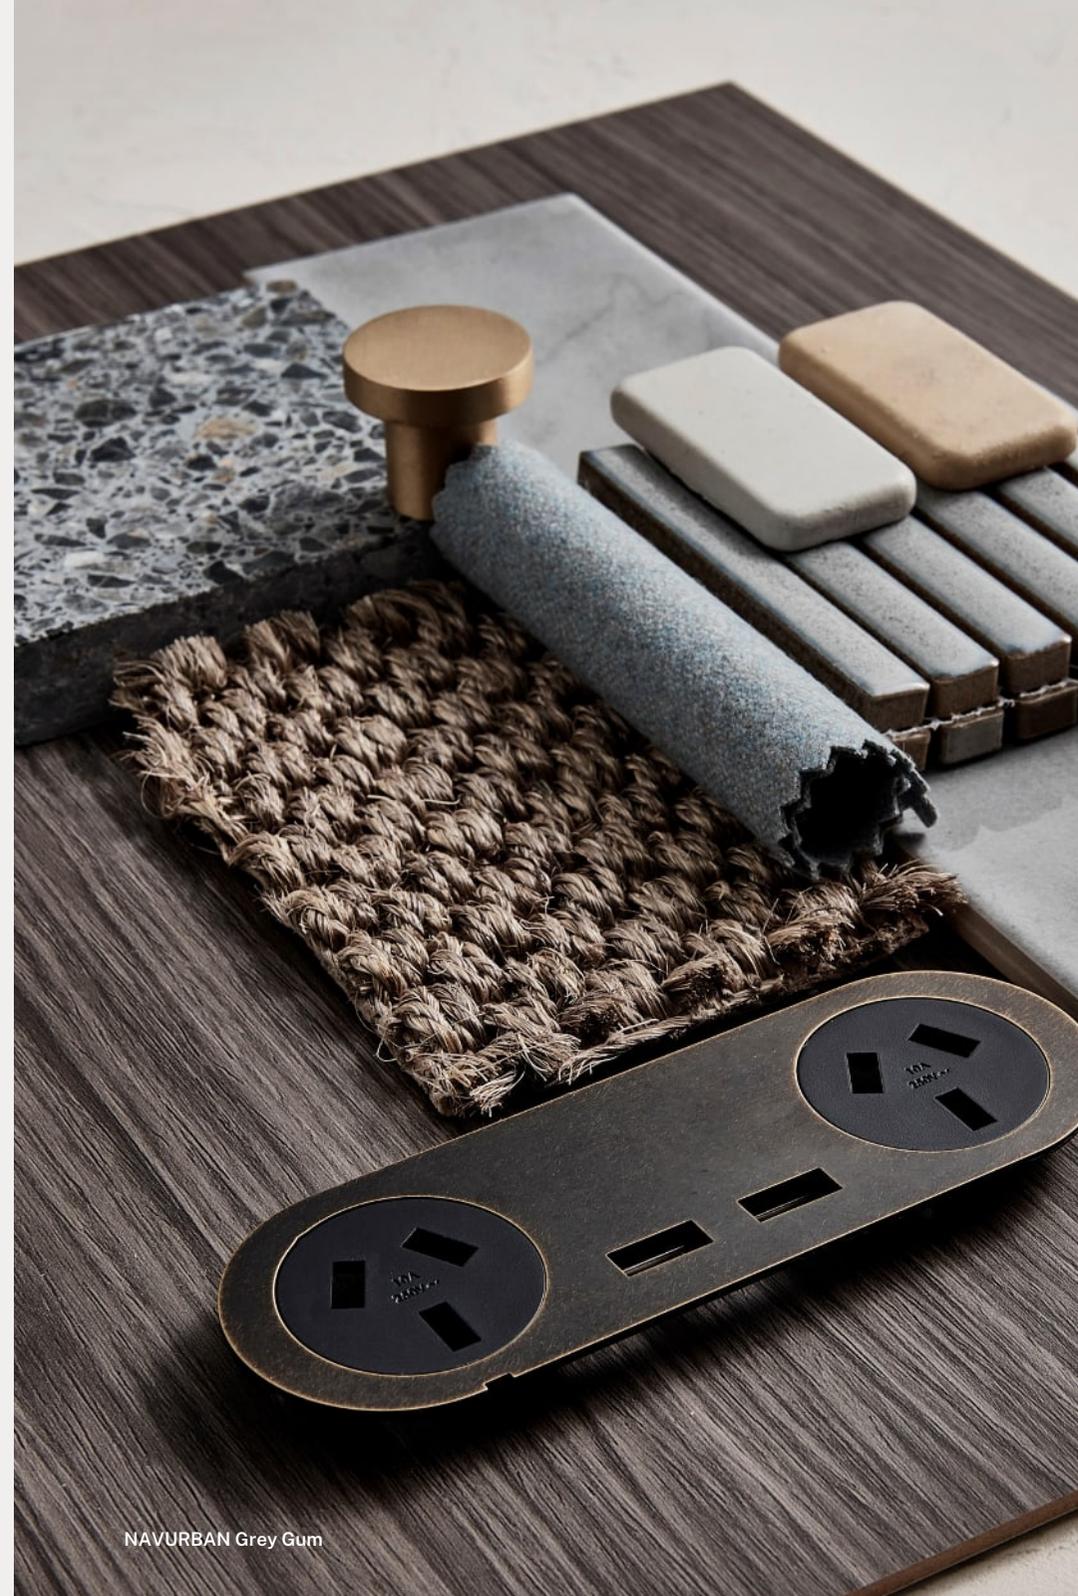

Owner, Kevin Kelly, has always had a passion for timber veneers. Over the years, he has transitioned NAV's products from the traditional methods of veneer manufacturing to technologically advanced, pre-finished, wood grain effect veneers.

Being environmentally responsible is a big deal to Kevin and his team. Raw, timber materials are ethically sourced from sustainably managed forests (and always have been).

NAV's expertise lies in engineering real timber into cutting-edge veneer products that offer durability, longevity, design flexibility and a wood grain detail that evokes a kinaesthetic experience.

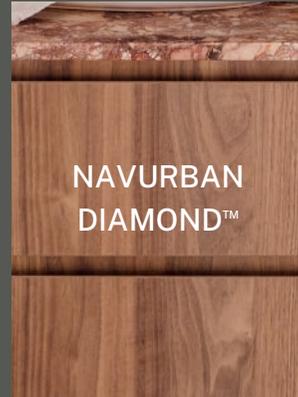

Partnering with architects, interior designers and builders, NAV was founded on a premise of introducing the Australian building industry to technically advanced premium veneer surfaces.

A lot has changed since the 80s, but NAV's mission – to be ahead of the curve in premium surface engineering and design – remains steadfast.

NAVCOMPACT™

Innovating Australian Amenities

– Impervious to water and providing outstanding scratch resistance, NAVCOMPACT™ delivers unprecedented design possibilities for commercial applications.

A photograph of a modern amenity space. In the foreground, there is a long, dark blue and white speckled countertop with two white sinks and black faucets. Behind the counter is a large mirror with a glowing white frame. In the background, a woman in a white top and black skirt is walking past a wall of wooden lockers. A white rectangular box highlights a section of the lockers.
