NAVENEER™ is a reconstructed timber veneer that offers consistency in wood grain, structure and tone to achieve the warmth and texture of solid timber in a totally customisable form. Available on an EO MR MDF substrate, NAVENEER™ is supplied unfinished, allowing you to determine the final finish for maximum creative freedom.

Technical & Design Advantages

Loved by designers for its consistency and versatility, NAVENEER™ creates the ideal surface for large or small installations. The veneer panels are available in a broad selection of colours & finishes, including everything from natural wood grains to bold contemporary looks. Predictability in the look and texture of the veneer is assured over conventional veneers due to NAVENEER™'s manufacturing process. Supplied unfinished with the grain running vertically along the length of the sheet, NAVENEER™ lets you decide on the final look you wish to achieve. The panels may be laid on the substrate of choice and our matching edging provides a professional finish to your project.

Environmental

NAVENEER™ is an environmentally sustainable choice in timber veneers, which includes strict forest management practices and sourcing from controlled origin timbers and reconstructed to optimise consistency in colour and grain.

Guarantee

NAV guarantees the intrinsic qualities of NAVENEER™. Discolouration due to exposure to sunlight and ultraviolet rays and/or slight colour variations between different NAVENEER™ panels cannot be considered a defect. In the event of any dispute, the guarantee and liability of New Age Veneers Pty Ltd is limited to the replacement of any material shown to be defective. New Age Veneers Pty Ltd reserves the right to discontinue any designs or products without notice at any time.

Cleaning & Maintenance

NAVENEER™ surfaces are easy to clean. Simply use a cloth dampened with warm water and detergent. If in doubt about a particular cleaning product or detergent, check with the manufacturer for suitability. Avoid the following when cleaning, as these substances and materials could damage the finish of your NAVENEER™ panels and make the surface susceptible to staining:

- Acetone or trichloroethylene
- Abrasive cleaners, harsh detergents and powders
- Scouring pads, steel wool and sandpaper
- Ceramic cooktop cleaners
- Bathroom and tile cleaners
- Oven cleaners
- Chlorine bleach

Accidental spills or splatters of any harsh substance should be wiped off immediately and the area cleaned thoroughly with a damp cloth.

For information regarding touch-ups and repairs, please visit our website newageveneers.com.au or call 02 9457 9622.

Colour Consistency

Although NAVENEER™ is a reconstructed timber veneer, it retains similar colour and grain characteristics to natural timbers. As a result, subtle grain differences may be visible between block lots. Colour variation of ±10% may also be evident between block lots due to batch dyeing. Just like natural timber, it is impossible to guarantee complete colour consistency between production blocks. Prolonged exposure to excessive sunlight may cause timber veneers to undergo sudden and irregular colour changes and is therefore not recommended.

Veneer Characteristics

A reconstructed veneer may display natural features such as pin knots, gum and mild-indentations. These are not classed as defects but purely intrinsic features of the veneer and its processing.

Technical Specifications

Panel sizes: 3000mm x 1200mm (variable thickness options available). Ask your local NAV representative for specifications and we will manufacture your panels to order.G1S (veneer on front face and balancing back on reverse of board); G2S (veneer on both sides); 3000 x 1200mm G1S or G2S. NAVENEER™ edging in 0.6mm thickness (available in 22mm and 38mm widths).

We recommend finishing panels with BC Coatings ZILCH! finish.

Available in:

- UT405 Zilch! Super Matte (0-5%)
- UT410 –Matte 10%
- UT430 –Satin 30%
- UT450 –Semi-gloss 50%

Zilch! has been specially formulated for New Age Veneers and is a 2-pac polyurethane containing both a non-yellowing agent and UV inhibitor. A UV inhibitor offers some protection against discolouration, but like all natural products, colour variation will occur over time. Contact your local representative or call 02 9457 9622.

Features

- Supplied in standard sheet sizes for better yield
- Even in colour and pattern, allowing for consistency across continuous sheets batch to batch
- Matching veneer edging
- Supplied raw to be able to customise the gloss finish

Applications

- Wall panelling
- Joinery (kitchen and bathroom)
- Furniture
- Doors
- Acoustic panelling
- Wall and ceiling linings

* NAVENEER™ is not recommended for high-wear horizontal surfaces such as kitchen benchtops and interior installations where extreme exposure to direct sunlight is an issue.
