SHINNOKI® range encapsulates nature and premium quality at its finest. The prefinished laminate showcases natural timber features and highlights the unique veneer texture. SHINNOKI® combines craftsmanship and sustainable timber to embody elegance and functionality. Ideal for any commercial, retail, hospitality, or residential projects to elevate spaces to the next level. Experience ease of fabrication, scratch resistance intrinsic characteristics with the prefinished SHINNOKI® range.

Technical & Design Advantages

SHINNOKI® is a prefinished wood veneer adhered to a phenolic laminate backing sheet. The SHINNOKI® range amplifies sophistication and opulence with six layers of a matte finish ultra-low emitting acrylate urethane UV-cured varnish partnered with a rolling technique and intermediate curing, enhancing the texture of the natural wood veneer. With the six-layer varnishing process the prefinished laminate provides ultimate scratch resistance against micro scratches without impacting the finish and colour. SHINNOKI® is available as a finished panel on a 3000mm x 1200mm E0 MR MDF substrate at the thickness of your choice. All decors have matching prefinished, unglued veneer edge banding or ABS edging.

Guarantee

New Age Veneers Pty Ltd guarantees the intrinsic qualities of SHINNOKI® prefinished wood panels. Discoloration due to exposure to sunlight and ultraviolet rays cannot be considered a material defect. In the event of any dispute, the guarantee and liability of New Age Veneers Pty Ltd is limited to the replacement of any material shown to be defective. New Age Veneers Pty Ltd reserves the right to discontinue any designs or products without notice at any time.

Exposure to Sunlight

SHINNOKI® laminates are made from natural timbers and will react to direct and indirect sunlight. The pre-finished surface contains a UV protection that offers some protection against discolouration, but like all natural wood products, colour variation will occur over time. Excessive exposure to direct sunlight may cause timber veneers to undergo sudden and irregular colour changes.

Environmental

SHINNOKI® veneer are an environmentally sustainable choice, as respect for nature and ecologically sound business practices are a key value of our supplier. All wood-based aspects are sourced from a responsible forestry and utilise mix match technology when processing veneers to ensure maximum yield and efficiency.

Veneer Grain & Characteristics

As the SHINNOKI® range is made from natural timber veneer, sheets may display natural features such as pin knots, gum, mild-indentations, and variances in curve direction of grain and off-centred crowns. Additionally, stock can vary in appearance within a sheet and between different sheets between batches and from samples to actual current stock. These are not classed as defects but purely intrinsic features of the veneer and process. SHINNOKI® grain runs vertically along the length of panel.

Cleaning & Maintenance

SHINNOKI® surfaces are easy to clean. For removing dust or small particles, use a soft, dry cloth. Tough dirt can be simply removed using a cloth dampened with warm water and detergent. If in doubt about a particular cleaning product or detergent, check with the manufacturer for suitability. Avoid the following when cleaning, as these substances and materials could damage the finish and make the surface susceptible to staining:

- Acetone or trichloroethylene
- Abrasive cleaners, harsh detergents and powders
- Scouring pads, steel wool and sandpaper
- Ceramic cooktop cleaners
- Bathroom and tile cleaners
- Oven cleaners
- Chlorine bleach

Accidental spills or splatters of any harsh substance should be wiped off immediately and the area cleaned thoroughly with a damp cloth.

Technical Specifications

Laminate only sheet size: 3050mm x 1220mm x 1mm. Panel sizes: 3000mm x 1200mm (Various E0 MR MDF thicknesses available). Matching prefinished veneer edging (0.6mm) available in 24mm and 38mm widths. Or matching ABS edging (1mm) available in 22mm, 38mm and 54mm. Bowed boards will only be recognised under the SHINNOKI® by NAV Warranty if a full check was made prior to the boards being cut. NAV will not warrant any bowing issues that may occur when purchasing SHINNOKI® G1S boards due to the unbalanced faces. Made to Order boards will have a 10-working day lead time.

Edging

SHINNOKI® can be supplied with matching veneer edging or ABS edging. The ABS edging is a highly durable 1.0mm ABS (non-PVC) edging to achieve a range of edging profiles. ABS edging is not the same material make up as the face of the board. ABS edging is subject to light refraction and may be perceived differently depending on the light sources, light source locations and general environment that impacts finished visibility. Each ABS edging decor match has been stringently reviewed and approved by New Age Veneers standard for sale. As such this is not classified as a product defect.

Features

- Supplied ready to fabricate (prefinished board)
- Scratch and abrasion properties
- Stain and water resistance
- Matching prefinished veneer or ABS edging
- Sustainably sourced

Applications

- Vertical installations
- Low-wear horizontal surfaces (shelving, office workstations, table, or desktops)
- Wall and ceiling panels
- Interior doors
- Furniture
- Kitchen, bathroom and laundry joinery
