With it’s industrial characteristics and on trend colour tones, NAVURBAN Elements™ range will bring any high-end commercial or residential project to life. Featuring cutting edge surface technology, NAVURBAN Elements™ will offer designers and architects the versatility to push interior design to its limits. Available in diverse contemporary colour tones the Elements range has high scratch and surface abrasion resistance along with an embossed textured surface and anti-bacterial finish.

Technical Advantages

NAVURBAN Elements™ surface finish offers scratch and abrasion resistance, as well as UV, stain and water resistant, offering savings in fabrication costs and ease of installation. NAVURBAN Elements™ is available as a finished panel, with matching ABS edging to complete the project.

Edging

NAVURBAN Elements™ matching ABS edging range is available in 1.0mm. The edging is available in 22mm, 38mm and 54mm widths to suit a wide range of panel thicknesses. ABS is a durable edging alternative that is ideal for high traffic areas and suitable for wet areas. ABS Edging is not the same material make up as the face of the board. ABS Edging is subject to light refraction and may be perceived differently depending on light sources, light source locations and general environment that impacts finished visibility. Each ABS edging décor match has been stringently reviewed and approved to New Age Veneers standard for sale. As such this is not classified as a product defect, edged on board samples are available on our website to view prior to order.

Guarantee

New Age Veneers Pty Ltd guarantees the intrinsic qualities of NAVURBAN Elements™. Although NAVURBAN Elements™ have been tested for up to 2000 hours of UV exposure, discoloration due to exposure to sunlight and ultraviolet rays cannot be considered a material defect. In the event of any dispute, the guarantee and liability of New Age Veneers Pty Ltd is limited to the replacement of any material shown to be defective. New Age Veneers Pty Ltd reserves the right to discontinue any designs or products without notice at any time.

Maintenance

NAVURBAN Elements™ surfaces are easy to clean using a cloth dampened with warm water and detergent. If in doubt about a particular cleaner or detergent, check with its manufacturer for the suitability. We recommend you test on a small area or sample prior to applying to the surface. Avoid the use of acetone or trichloroethylene for cleaning purposes. Use of abrasive cleaners, powders, scouring pads, steel wool, sandpaper etc. can damage the finish and make the surface susceptible to staining. Accidental spills or splatters from these harsh materials should be wiped off immediately, and the area cleaned thoroughly with a damp cloth. Examples of these materials are: Ceramic cooktop cleaners, tub and tile cleaners, chlorine bleach, oven cleaners, and harsh detergents. For information regarding touch up and repairs please contact your local representative or call 02 9457 9622.

Suitable application use for NAVURBAN Elements™

Home*	Aged Care*
• Kitchen cabinetry	• Bedheads
• Media Units	• Wardrobes
• Wardrobes	• Bedroom Furniture
Retail*	Education*
• Merchandising displays	• Storage solutions
• Storage Units	• Cabinetry
• Shop fit outs	
Offices*	Hospitality*
• Reception Areas	• Lobbies / Reception
	• Bedheads
	• Hotel / Motel Rooms

* Includes wall and ceiling linings

Features

- Pre finished board
- Colour consistency
- Matching ABS edging
- Scratch and abrasion resistance
- Anti-bacterial finish
- High level UV resistance
- Adhered to the substrate using low VOC (Volatile Organic Compound) crosslinking water-based EVA glue
- Supplied on low formaldehyde substrates - E0 MR MDF

Fabrication

Panel saws or table saws may be used to cut NAVURBAN Elements™. Routers for trimming edges must have a smooth, clean base plate, so that the surface will not be scratched. Use carbide-STEPSped bits with ball bearing guide rolls. Keep all bits sharp. Drilling into NAVURBAN Elements™ may be done with standard wood bits or with router bits. For a final edge finishing use a flat, smooth or fine file.

Technical Specifications

NAVURBAN Elements™ Panel Size: 2400mm x 1200mm, 3000mm x 1200mm, 3600mm x 1200mm.

All boards are finished G1S (white/black backing) or G2S on a E0 MR MDF substrate.

Made to Order boards will have a 10 working day lead time.

For more information on stocked items please contact your local representative or call 02 9457 9622.
