

NAVENEER™

Experience Classic
Italian Sophistication

For more information

T 02 9457 9622
reception@newageveneers.com.au
newageveneers.com.au

NAVENEER™ is a reconstructed timber veneer that offers consistency in wood grain, structure and tone to achieve the warmth and texture of solid timber in a totally customisable form. Available on an E0 MR MDF substrate, NAVENEER™ is supplied unfinished, allowing you to determine the final finish for maximum creative freedom.

Technical & Design Advantages

Loved by designers for its consistency and versatility, NAVENEER™ creates the ideal surface for large or small installations. The veneer panels are available in a broad selection of colours & finishes, including everything from natural wood grains to bold contemporary looks. Predictability in the look and texture of the veneer is assured over conventional veneers due to NAVENEER™'s manufacturing process. Supplied unfinished with the grain running vertically along the length of the sheet, NAVENEER™ lets you decide on the final look you wish to achieve. The panels may be laid on the substrate of choice and our matching edging provides a professional finish to your project.

Environmental

NAVENEER™ is an environmentally sustainable choice in timber veneers, which includes strict forest management practices and sourcing from controlled origin timbers and reconstructed to optimise consistency in colour and grain.

Guarantee

NAV guarantees the intrinsic qualities of NAVENEER™. Discolouration due to exposure to sunlight and ultraviolet rays and/or slight colour variations between different NAVENEER™ panels cannot be considered a defect. In the event of any dispute, the guarantee and liability of New Age Veneers Pty Ltd is limited to the replacement of any material shown to be defective. New Age Veneers Pty Ltd reserves the right to discontinue any designs or products without notice at any time.

Cleaning & Maintenance

NAVENEER™ surfaces are easy to clean. Simply use a cloth dampened with warm water and detergent. If in doubt about a particular cleaning product or detergent, check with the manufacturer for suitability. Avoid the following when cleaning, as these substances and materials could damage the finish of your NAVENEER™ panels and make the surface susceptible to staining:

- Acetone or trichloroethylene
- Abrasive cleaners, harsh detergents and powders
- Scouring pads, steel wool and sandpaper
- Ceramic cooktop cleaners
- Bathroom and tile cleaners
- Oven cleaners
- Chlorine bleach

Accidental spills or splatters of any harsh substance should be wiped off immediately and the area cleaned thoroughly with a damp cloth.

For information regarding touch-ups and repairs, please visit our website newageveneers.com.au or call 02 9457 9622.

Colour Consistency

Although NAVENEER™ is a reconstructed timber veneer, it retains similar colour and grain characteristics to natural timbers. As a result, subtle grain differences may be visible between block lots. Colour variation of ±10% may also be evident between block lots due to batch dyeing. Just like natural timber, it is impossible to guarantee complete colour consistency between production blocks. Prolonged exposure to excessive sunlight may cause timber veneers to undergo sudden and irregular colour changes and is therefore not recommended.

Veneer Characteristics

A reconstructed veneer may display natural features such as pin knots, gum and mild-indentations. These are not classed as defects but purely intrinsic features of the veneer and its processing.

Technical Specifications

Panel sizes: 3000mm x 1200mm (variable thickness options available). Ask your local NAV representative for specifications and we will manufacture your panels to order.G1S (veneer on front face and balancing back on reverse of board); G2S (veneer on both sides); 3000 x 1200mm G1S or G2S. NAVENEER™ edging in 0.6mm thickness (available in 22mm and 38mm widths).

We recommend finishing panels with BC Coatings ZILCH! finish.

Available in:

- UT405 Zilch! Super Matte (0-5%)
- UT410 –Matte 10%
- UT430 –Satin 30%
- UT450 –Semi-gloss 50%

Zilch! has been specially formulated for New Age Veneers and is a 2-pac polyurethane containing both a non-yellowing agent and UV inhibitor. A UV inhibitor offers some protection against discolouration, but like all natural products, colour variation will occur over time. Contact your local representative or call 02 9457 9622.

Features

- Supplied in standard sheet sizes for better yield
- Even in colour and pattern, allowing for consistency across continuous sheets batch to batch
- Matching veneer edging
- Supplied raw to be able to customise the gloss finish

Applications

- Wall panelling
- Joinery (kitchen and bathroom)
- Furniture
- Doors
- Acoustic panelling
- Wall and ceiling linings

* NAVENEER™ is not recommended for high-wear horizontal surfaces such as kitchen benchtops and interior installations where extreme exposure to direct sunlight is an issue.

NAVURBAN WALL™
Unlock Interior
Imagination

For more information

T 02 9457 9622
reception@newageveneers.com.au
newageveneers.com.au

NAVURBAN Wall™ is a specially designed wallpaper product with an advanced and durable embossed olefin film finish to add a timber element within every space. Proudly designed and manufactured in Australia, NAVURBAN Wall™ is not just a product; it’s a revolution in interior design. NAVURBAN Wall™ designed from the acclaimed NAVURBAN™ and NAVURBAN DIAMOND™ finishes with a wallpaper-lined backing that’s nothing short of extraordinary. Ensuring superior quality in the form of wallpaper rolls. Choose from a palette of meticulously curated décor colours to harmonise with your vision.

Technical & Design Advantages

NAVURBAN Wall™ offers consistent grain structure and tones across the wallpaper rolls. With the NAVURBAN™ and NAVURBAN DIAMOND™ finishes, ensure seamless connections between joins across a large surface area. Scratch and abrasion resistance, as well as UV, stain, and water resistance the NAVURBAN Wall™ offers the ultimate surface finish.

Grain Direction

NAVURBAN Wall™ is finished with the NAVURBAN™ and NAVURBAN Diamond™ decors with the grain running vertically along the roll.

Guarantee

New Age Veneers Pty Ltd guarantees the intrinsic qualities of NAVURBAN Wall™. Although, NAVURBAN Wall™ finishes have been tested for up to 2000 hours of UV exposure, discoloration due to exposure to sunlight and ultraviolet rays cannot be considered a material defect. In the event of any dispute, the guarantee and liability of New Age Veneers Pty Ltd is limited to the replacement of any material shown to be defective. New Age Veneers Pty Ltd reserves the right to discontinue any designs or products without notice at any time.

Maintenance

The NAVURBAN Wall™ surface is easy to clean using a cloth dampened with warm water and detergent. If in doubt about a particular cleaner or detergent, check with its manufacturer for the suitability. We recommend you test on a small area or sample prior to applying to the surface. Avoid the use of acetone or trichloroethylene for cleaning purposes. Use of abrasive cleaners, powders, scouring pads, steel wool, sandpaper etc. can damage the finish and make the surface susceptible to staining. Accidental spills or splatters from these harsh materials should be wiped off immediately, and the area cleaned thoroughly with a damp cloth. Examples of these materials are: Ceramic cooktop cleaners, tub and tile cleaners, chlorine bleach, oven cleaners, and harsh detergents.

For information regarding touch up and repairs please contact your local representative or call 02 9457 9622

Technical Specifications

NAVURBAN Wall™ roll size: 9850mm x 600mm

Made to Order Rolls will have a 10-working day lead time. Any orders for colours outside of the current offered will have a minimum order quantity applicable of 10 rolls.

Features & Benefits

The hard-wearing wallpaper is a non-PVC decorative roll with advance embossing and texture capabilities.

- Extensive décor range selection
- Pre-Finished wallpaper surface
- Colour and grain consistency over rolls
- Scratch and abrasion resistance
- High level UV resistances
- Easy Installation
- Ideal and manageable roll dimensions – 9850mm x 600mm
- Low-level Maintenance

Applications

Product is suitable for all wall & ceiling lining applications in the following environments:

- Home
- Retail
- Offices
- Aged Care
- Education
- Hospitality

*Not suitable for horizontal traffic use and joinery applications

NAVLAM SANDBLASTED™

Uncover Timbers Elegance,
Embrace Laminates Strength

For more information

T 02 9457 9622
reception@newageveneers.com.au
newageveneers.com.au

NAVLAM Sandblasted™ is the ultimate pre-finished reconstructed timber veneer. Combining the warmth and texture of solid timber with the functionality, durability, and resilience of a laminate with an acrylic polyurethane finish, NAVLAM Sandblasted™ is the ideal choice for any interior application. NAVLAM Sandblasted™ panels deliver outstanding consistency across the grain and comes in an exciting range of colours, wood grains and panel sizes. Application is limited only by the imagination.

Technical & Design Advantages

As a reconstructed veneer, NAVLAM Sandblasted™ delivers consistency in woodgrain structure and tone across each panel. The veneer surface is finished with high quality, scratch and stain resistant 2-pac acrylic polyurethane finish and laid on a laminate back. NAVLAM Sandblasted™ is available as a finished panel on your E0 MR MDF substrate thickness of your choice, all décor colours have matching ABS (non-PVC) edging, making fabrication and installation simple and cost effective.

Environmental

NAVLAM Sandblasted™ laminates and panels are an environmentally sustainable choice in pre-finished timber veneers. Our stringent sustainable sourcing criteria must be met, which includes strict forest management practices and sourcing veneers from controlled origin veneer suppliers.

Application

NAVLAM Sandblasted™ comes ready for immediate fabrication or application. NAVLAM Sandblasted™ is suitable for vertical installations and light-use horizontal applications such as shelving.

However, it is not recommended for high wear horizontal surfaces such as kitchen benchtops. The pre-finished surface contains a UV inhibitor to minimise discolouration caused by UV rays. To retain colour consistency, NAVLAM Sandblasted™ is not for use in areas with prolonged exposure to direct sunlight.

Edging

The NAVLAM Sandblasted™ collection is supplied with matching, highly durable 1.0mm ABS (non-PVC) edging to achieve a range of edging profiles. Edging is also available in 22mm, 38mm and 54mm widths to suit a wide range of panel thicknesses. ABS Edging is not the same material make up as the face of the board. ABS Edging is subject to light refraction and may be perceived differently depending on light sources, light source locations and general environment that impacts finished visibility. Each ABS edging décor match has been stringently reviewed and approved to New Age Veneers standard for sale. As such this is not classified as a product defect, edged on board samples are available on our website to view prior to order.

Grain Direction

NAVLAM Sandblasted™ grain runs vertically along the length of the panel.

Guarantee

New Age Veneers Pty Ltd guarantees the intrinsic qualities of NAVLAM Sandblasted™ laminates. Discoloration due to exposure to sunlight and ultraviolet rays cannot be considered a material defect. In the event of any dispute, the guarantee and liability of New Age Veneers Pty Ltd is limited to the replacement of any material shown to be defective. New Age Veneers Pty Ltd reserves the right to discontinue any designs or products without notice at any time.

Exposure To Sunlight

NAVLAM Sandblasted™ laminates are reconstructed from natural timbers and will react to direct and indirect sunlight.The pre-finished surface contains a UV inhibitor that offers some protection against discolouration, but like all natural wood products, colour variation will occur over time. Excessive exposure to direct sunlight may cause timber veneers to undergo sudden and irregular colour changes.

Cleaning & Maintenance

NAVLAM Sandblasted™ surfaces are easy to clean. Simply use a cloth dampened with warm water and detergent. If in doubt about a particular cleaning product or detergent, check with the manufacturer for suitability. Avoid the following when cleaning, as these substances and materials could damage the finish and make the surface susceptible to staining:

- Acetone or trichloroethylene
- Abrasive cleaners, harsh detergents, and powders
- Scouring pads, steel wool and sandpaper
- Ceramic cooktop cleaners
- Bathroom and tile cleaners
- Oven cleaners
- Chlorine bleach

Accidental spills or splatters of any harsh substance should be wiped off immediately and the area cleaned thoroughly with a damp cloth.

Features & Benefits

- Supplied ready to fabricate (pre-finished board)
- Consistent colour and grain
- Scratch and abrasion properties
- Stain and water resistant
- Matching ABS edging
- Fire test certification

Applications

- Vertical installations and some low traffic horizontal applications (i.e. shelving)
- Commercial areas (i.e. reception areas, staff rooms, board rooms, workstations, storage joinery)
- Kitchen, bathroom and laundry joinery
- Furniture
- Restrooms
- Wall and ceiling linings

Fabrication

Before fabrication, check all panels for defects. Keep the plastic film on the panels during fabrication, only removing it once the product is installed. To cut Navlam Sandblasted™, use a CNC router, panel saw, or table saw. Routers for trimming edges must have a smooth, clean base plate to avoid scratching the veneer surface. When drilling into NAVLAM Sandblasted™, use standard wood bits, router bits or carbide-bits with ball bearing guide rolls, ensuring any drill bit used is sharp. For a final edge finishing, use a flat, smooth, or fine file. Please note: the use of contact adhesive will void any warranty. Panels must only be laminated using a PUR adhesive.

NAVURBAN ELEMENTS™

Exceed Interior Design Boundaries

For more information

T 02 9457 9622
reception@newageveneers.com.au
newageveneers.com.au

With it’s industrial characteristics and on trend colour tones, NAVURBAN Elements™ range will bring any high-end commercial or residential project to life. Featuring cutting edge surface technology, NAVURBAN Elements™ will offer designers and architects the versatility to push interior design to its limits. Available in diverse contemporary colour tones the Elements range has high scratch and surface abrasion resistance along with an embossed textured surface and anti-bacterial finish.

Technical Advantages

NAVURBAN Elements™ surface finish offers scratch and abrasion resistance, as well as UV, stain and water resistant, offering savings in fabrication costs and ease of installation. NAVURBAN Elements™ is available as a finished panel, with matching ABS edging to complete the project.

Edging

NAVURBAN Elements™ matching ABS edging range is available in 1.0mm. The edging is available in 22mm, 38mm and 54mm widths to suit a wide range of panel thicknesses. ABS is a durable edging alternative that is ideal for high traffic areas and suitable for wet areas. ABS Edging is not the same material make up as the face of the board. ABS Edging is subject to light refraction and may be perceived differently depending on light sources, light source locations and general environment that impacts finished visibility. Each ABS edging décor match has been stringently reviewed and approved to New Age Veneers standard for sale. As such this is not classified as a product defect, edged on board samples are available on our website to view prior to order.

Guarantee

New Age Veneers Pty Ltd guarantees the intrinsic qualities of NAVURBAN Elements™. Although NAVURBAN Elements™ have been tested for up to 2000 hours of UV exposure, discoloration due to exposure to sunlight and ultraviolet rays cannot be considered a material defect. In the event of any dispute, the guarantee and liability of New Age Veneers Pty Ltd is limited to the replacement of any material shown to be defective. New Age Veneers Pty Ltd reserves the right to discontinue any designs or products without notice at any time.

Maintenance

NAVURBAN Elements™ surfaces are easy to clean using a cloth dampened with warm water and detergent. If in doubt about a particular cleaner or detergent, check with its manufacturer for the suitability. We recommend you test on a small area or sample prior to applying to the surface. Avoid the use of acetone or trichloroethylene for cleaning purposes. Use of abrasive cleaners, powders, scouring pads, steel wool, sandpaper etc. can damage the finish and make the surface susceptible to staining. NAVURBAN™ and NAVURBAN Diamond™ is a contemporary take on decorative surfaces, offering a striking collection of environmentally preferable designs that feature the innovative surface technologies from Japan. The unique finish of NAVURBAN™ and NAVURBAN Diamond™ delivers a 3D embossed surface texture with advanced performance characteristics. The embossing creates a tactile surface in a range of effects, including finely textured woodgrains and smooth finishes.

Technical Advantages

NAVURBAN™ and NAVURBAN Diamond™ offers consistency in woodgrain structure and tone across each panel, creating the ideal surface for large or small installations. The surface finish offers scratch and abrasion resistance, as well as UV, stain and water resistant; offering savings in fabrication costs and ease of installation. NAVURBAN™ and NAVURBAN Diamond™ is available as a finished panel on your substrate of choice, with matching ABS edging to complete the project.

Edging

NAVURBAN™ and NAVURBAN Diamond™ matching ABS edging range is available in 22mm, 38mm and 54mm widths by 1.0mm. ABS is a durable edging alternative that is ideal for high traffic areas and suitable for wet areas. ABS Edging is not the same material make up as the face of the board. ABS Edging is subject to light refraction and may be perceived differently depending on light sources, light source locations and general environment that impacts finished visibility. Features & Benefits

- The benefits of NAVURBAN™ and NAVURBAN Diamond™ include:
- Extensive range of designs
 - Pre finished board
 - Colour and grain consistency over a large number of sheets
 - Matching ABS edging
 - Scratch and abrasion resistance
 - High level UV resistance
 - Adhered to the substrate using low VOC (Volatile Organic Compound) crosslinking water-based EVA glue

Please refer to the website for full details of NAVURBAN™ and NAVURBAN Diamond™ environmental credentials. NAVURBAN™ and NAVURBAN Diamond™ is produced in Australia to ensure the highest levels of quality and service.

Maintenance

NAVURBAN™ and NAVURBAN Diamond™ surfaces are easy to clean using a cloth dampened with warm water and detergent. If in doubt about a particular cleaner or detergent, check with its manufacturer for the suitability. We recommend you test on a small area or sample prior to applying to the surface. Avoid the use of acetone or trichloroethylene for cleaning purposes. Use of abrasive cleaners, powders, scouring pads, steel wool, sandpaper etc. can damage the finish and make the surface susceptible to staining. Accidental spills or splatters from these harsh materials should be wiped off immediately, and the area cleaned thoroughly with a damp cloth. Examples of these materials are: Ceramic cooktop cleaners, tub and tile cleaners, chlorine bleach, oven cleaners, and harsh detergents.

For information regarding touch up and repairs please contact your local representative or call 02 9457 9622
